

The Purpose of Data Tools allows users to handle large datasets easily, gain insights into trends and patterns, and predict future outcomes. There are so many factors that help boost Big tools one of those is the growth of the internet, social media, and mobile devices has led to an explosion of big data. Bias in Machine Learning uses if a facial recognition algorithm is trained on predominantly white faces. And helps it run smoothly. The Unit Test was very helpful to understand all the activities in a simple manner.
